

National Mathematics Magazine

INDEX TO VOLUME XVIII

October, 1943, to May, 1944

TOPIC	AUTHOR	PAGE
Announcement.....	S. T. Sanders.....	298
Application of Fejer Summability.....	A. W. Straiton.....	106
Calculus Looks at the Barometer.....	Hollis D. Hatch.....	127
Eighth Lesson in the History of Mathematics.....	G. A. Miller.....	261
Evaluation of a Limit by a Sequence of Triangles.....	C. E. Springer.....	185
Fractional Indices, Exponents and Powers.....	Carl B. Boyer.....	81
Gauss and the Early Development of Algebraic Numbers (I).....	E. T. Bell.....	188
Gauss and the Early Development of Algebraic Numbers (II).....	E. T. Bell.....	219
Geometric Derivation of the Formula for Integration by Parts.....	Benham M. Ingersoll.....	280
Geometry of the Circular Horn Triangle.....	Edward Kasner, Aida Kalish.....	299
Grades and Distributions.....	Norman E. Rutt.....	120
Henry Lewis Rietz, 1875-1943.....	C. D. Smith.....	182
Influence of Mathematics on the Philosophy of Spinoza.....	R. H. Moorman.....	108
Influence of Tidal Theory Upon the Development of Mathematics.....	H. Bateman.....	14
Institute for Mathematics Teachers.....	W. W. Rankin.....	295
John Napier and His Logarithms.....	E. R. Sleight.....	145
Mathematics in a World at War—a Challenge to Mathematics Teachers.....	James H. Zant.....	77
Mathematics in Scotland Before the Eighteenth Century.....	E. R. Sleight.....	305
Mathematics in the Open Forum.....	Sister Helen Sullivan.....	276
Needs for Studies in Mathematical Education.....	Wm. L. Schaaf.....	27
Next Steps in Education and in the Teaching of Mathematics.....	William Betz.....	153
On Certain Limits.....	Alfred Brauer.....	64
On the Cevians of a Triangle.....	N. A. Court.....	3
On Derived Sets.....	Norman E. Rutt.....	53
On the Summation of Certain Types of Series.....	A. M. Niessen.....	271
Plane Right Triangles with Sides and Area in Arithmetic Progression.....	Harris Jones.....	177
Plea for Analytical Mechanics.....	Alfred Hume.....	49
Post-War Planning in Mathematics.....	S. T. Sanders.....	2
Professor James McGiffert.....	Lynn L. Merrill.....	142
Quadrangle borde de triangles isocèles semblables.....	V. Thébault.....	7
Quadratic Equations in Engineering Problems.....	Raymond C. Reese.....	99
Random Jottings from an Instructor's Notebook.....	Cecil B. Read.....	205

Relation Between Radii of Inscribed and Circumscribed circles	J. H. Butchart	37
Seventh Lesson in the History of Mathematics	G. A. Miller	67
Special Integration	N. A. Court	37
Spherical Trigonometry—An Emergency Course	R. B. McClenon	32
Teaching Mathematics to the A. A. F. College Training Detachment (Air Crew)	James H. Zant	234
To Our Subscribers and the General Mathematical Public	S. T. Sanders	258
Trends in the Teaching of Secondary Mathematics	Albert A. Bennett	315
We Look Before and After	Marion E. Stark	116
William Betz Analysis	S. T. Sanders	218
Zero: the Symbol, the Concept, the Number	Carl B. Boyer	323

BOOKS REVIEWED	REVIEWER	PAGE
Analytic Geometry, by Frederick H. Steen and Donald H. Ballou	Charles B. Barker	179
Arithmetic for the Emergency, by G. M. Fuch, F. B. Knight and J. W. Studebaker	Frank Edwin Wood	137
Basic Mathematics for War Industry, by Paul H. Daus, John M. Gleason, William M. Whyburn	H. A. Simmons	253
Basic Mathematics, by Walter W. Hart	James M. Earl	293
Business Mathematics, by Cleon C. Richtmeyer and Judson W. Foust	M. E. Wescott	47
Calculus Refresher for Technical Men, by A. Albert Klaf	H. A. Simmons	256
Celestial Navigation, A Problem Manual, by Walter Hadel	Oliver J. Lee	339
Commercial Algebra, by Hugh E. Stelson and Harold P. Rogers	H. A. Simmons	178
Concise Spherical Trigonometry with Applications, by Jacques Redway Hammond	P. K. Smith	139
Differential and Integral Calculus, by Clyde E. Love	F. C. Gentry	138
Engineering Problems Illustrating Mathematics, by John W. Cell, Committee Chairman (S.P.E.E.)	William E. Byrne	140
Geometry, with Military and Naval Applications, by Willis F. Kern and James R. Bland	William E. Byrne	339
Intermediate Algebra for College Students, by Thurman S. Peterson	George A. Newton	93
Introduction to Navigation and Nautical Astronomy, by W. G. Shute, W. W. Shirk, G. F. Porter and C. Hemenway	Oliver J. Lee	254
Mathematics for Navigators, by Delwyn Hyatt and Bennett M. Dodson	E. L. Edmonson	294
Mathematics for the Emergency, by C. J. Lapp, F. B. Knight and H. L. Rietz	Frank Edwin Wood	137
Navigation, by Lyman M. Kells, Willis F. Kern, and James R. Bland	P. K. Smith	340

BOOKS REVIEWED	REVIEWER	PAGE
Plane and Spherical Trigonometry. Alternate Edition, by Lyman M. Kells, Willis F. Kern and James R. Bland.	P. K. Smith	93
Plane Trigonometry, Solid Geometry, and Spherical Trigonometry, by Walter W. Hart and William L. Hart.	J. William Peters	94
Plane Trigonometry with Tables, by D. H. Ballou and F. H. Steen.	F. A. Rickey	178
Principles of College Algebra, by Morris S. Knebelman and Tracy Y. Thomas.	William E. Byrne	96
Tables of Reciprocals of the Integers from 100,009 Through 200,000, by Mathematical Tables Project, Works Projects Administration of the Federal Works Agency, Arnold N. Lowan, Technical Director.	Kaj. L. Nielsen	253
Tables:		
(1) Moment of Inertia and Section Modulus of Ordinary Angles, Channels, and Bulb Angles, with Certain Plate Combinations,		
(2) Sine and Cosine Integrals for Arguments from 10 to 100,		
(3) Probability Functions,		
(4) Miscellaneous Physical Tables,		
(5) Natural Logarithms, by Federal Works Agency, Works Projects Administration for the City of New York, under the direction of Arnold N. Lowan, and sponsored by National Bureau of Standards.	John W. Cell	46
Vectors and Matrices, by C. C. MacDuffie	Wallace Givens	255

PROBLEMS SOLVED

Of each pair of successive numbers followed by a semicolon, or a period, the first denotes the *NUMBER* of the problem solved, the second the *NUMBER* of the page on which it is solved.
